How to design a hair salon like a gallery

NOGUERA HAIR & ART SALON

DESIGNER'S VISION

- To enhance the industrial and sobre character of the space
- To be inspired by the paintings in museums
- To use the original materials

PLAN

1. Entrance
2. Reception
3. Styling and cutting area
4. Shampoo area
5. Toilet

90m²

SPECIFIC BACKGROUND

Noguera Hair & Art Salon is a new space that fuses two business concepts: hair salon and art gallery. It's owner, hairstylist and painter, is a great art and sculpture lover, so the starting point of the project was to combine his two passions in this new salon.

DESIGN CONCEPT

The salon is arranged in a double-level zone with an interior patio. The lower zone is dedicated to the feminine hairdressing salon, while the upper zone is dedicated to the barbershop and the beauty cabin.

To design the space, CM2 Disseny was inspired by the austerity of art galleries.

In the design of the salon styling stations, Cm2 Disseny was inspired by the paintings in museums. So, big frames hanged with ropes enclose the mirrors, pursuing the effect to the customer, when relaxing in front of the mirror, to perceive herself or himself as a framed work of art.

SECTION

Colours had been chosen from a monochromatic point of view, to enhance the industrial and sobre character of the space. Materials also follow this premise: concrete, black brilliant lacquer, and timber to break the coldness of greys.

The furniture combines own designs of Cm2 Disseny with classics of the industrial design like the Eames Chair and the Eames Armchair.
